Aalborg Utility [WWTP] - DK

Aalborg Utility is divided into two Wastewater Treatment Plant departments, that cover the need for wastewater treatment in Denmark's fourth largest city.

The plants are designed with a capacity of 440.000 PE and process daily wastewater from 225.000 residents and hundreds of companies.

NISSEN energy supplied 3 pcs. NPM 250 CHP and 2 pcs. Unigas P71 burners. The CHP plants deliver 5.303 MWh of electricity annually. In addition, NISSEN energy has delivered a gas treatment plant, that annually processes 607 million gallon of biogas.

NISSEN energy carry out maintenance on all equipment supplied.
