## **Mariagerfjord Vand [WWTP] - DK**

With EnviDan A/S, as the main contractor of a new modern central heating plant for Mariagerfjord Vand, NISSEN energy delivered 1 pc. MAN E 2876 LE 322 Gas engine unit and a 440 kW boiler and burner system.

The areas existing 10 WWTP plants were shut down and the new central heating plant took over the disposal of all wastewater in Mariagerfjord Municipality.

The biogas from the digester tank is burned in the gas engine, which produces heat to buildings and power to the mains.

NISSEN energy performs service and maintenance at the plant.
