Spjald Fjernvarme- og Vandværk [District Heating] - DK

NISSEN energy 's co-operation with Spjald Fjernvarme- og Vandværk goes way back, since April 1991.

Retrofit, we call it when new equipment is updated and made modern with the utilization of as many as possible recyclable parts from the existing equipment.

In this way, NISSEN energy has delivered 1 pc. 2.5 MW combi natural gas/ biogas burner at the existing boiler. In addition, servomotors and controlpanel was recycled.

NISSEN energy performs service and maintenance on the equipment of the plant.
